

Your Occupational Hygiene, Environmental Risk Assessment & Monitoring Specialists

“Adding insight through expertise”

Occupational Hygiene Programme Management

Your Goal: Compliance with the Occupational Hygiene Monitoring requirements contained in, and framed under, the Occupational Health and Safety Act, 1993

Achieved by:

- a) Health Risk Assessments
- b) Ergonomics Assessments
- c) Indoor Air Quality Investigations
- d) Exposure Incident Investigations
- e) Equipment Sales, Servicing, Calibration
- f) Municipal Schedule Trade Permit Requirements
- g) Crystalline Silica Monitoring and DoL Submissions
- h) Provision of site-specific Information and Training
- i) MSDS / SDS Expertise and Formulation according to the GHS
- j) Whole-Body and Hand/Arm Vibration Monitoring
- k) Hazardous Chemical Substances Risk Assessments and Monitoring
- l) Noise, Light, Ventilation & Heat Stress Risk Assessments and Monitoring
- m) Gas & Vapour Detection & Leak Detection and Repair Programmes (LDAR)
- n) Asbestos Work (Compilation & Approval of Plans of Work; Contractor Training; Air Monitoring and Inspection (Asbestos removal projects); Asbestos Identification Inventories, Bulk Sampling, Clearance Monitoring)

Environmental Programme Management

Your Goal: Compliance with the NEMA, NEM:AQA, EIA, DEAT, RoD, AEL, STP and Section 21 Listed Activities.

Achieved by:

- a) ECO Services
- b) Odour Investigations
- c) Diesel Emission Monitoring
- d) Water and Soil Sampling & Monitoring
- e) Environmental Risk Assessments & Audits
- f) Dust Fallout Monitoring (ASTM D 1739-70)
- g) Operational Environmental Plan Audits (OEMP)
- h) Real-Time Particulate Monitoring (TSP, PM2.5, PM10)
- i) Emission Inventories / Atmospheric Emission Licenses (AEL)
- j) Ambient Air Quality Monitoring (Fence line and Communities)
- k) Environmental Noise Impact Assessments / Noise Modelling & Mapping
- l) Stack Emission Monitoring (Point Source Monitoring - NEMAQA Section 21 Listed Activities and Municipal STP; Boiler Efficiency Testing)
